Moorgen AI Smart Screen Italy Series

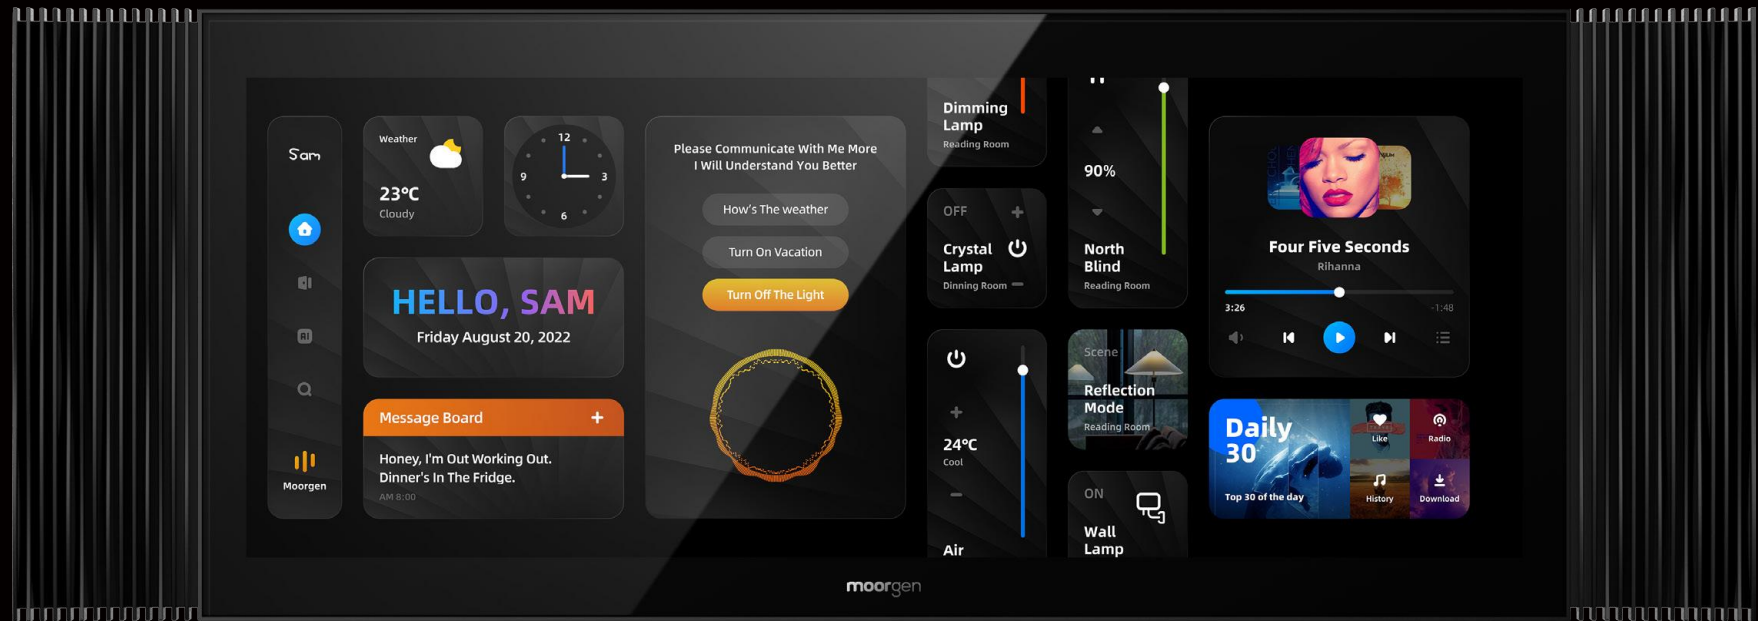

It features 12.3 inch screen
 its powerful function can control **all** smart devices in the house
 also with **AI smart** user habit analysis function
 Support voice control of smart devices throughout the house

21 Degree Golden Sound Effect Make The Sound Quality Richer

To ensure the ultimate sound quality
experience of the AI smart screen
Designers set the speakers on the smart screen
And based on acoustic design
the speakers are also designed
a 21 degree golden sound refraction angle
which will make the sound quality richer
Its built-in amplifier has been
specially tuned by acoustic experts
To ensure AI smart screen
features high quality sound output

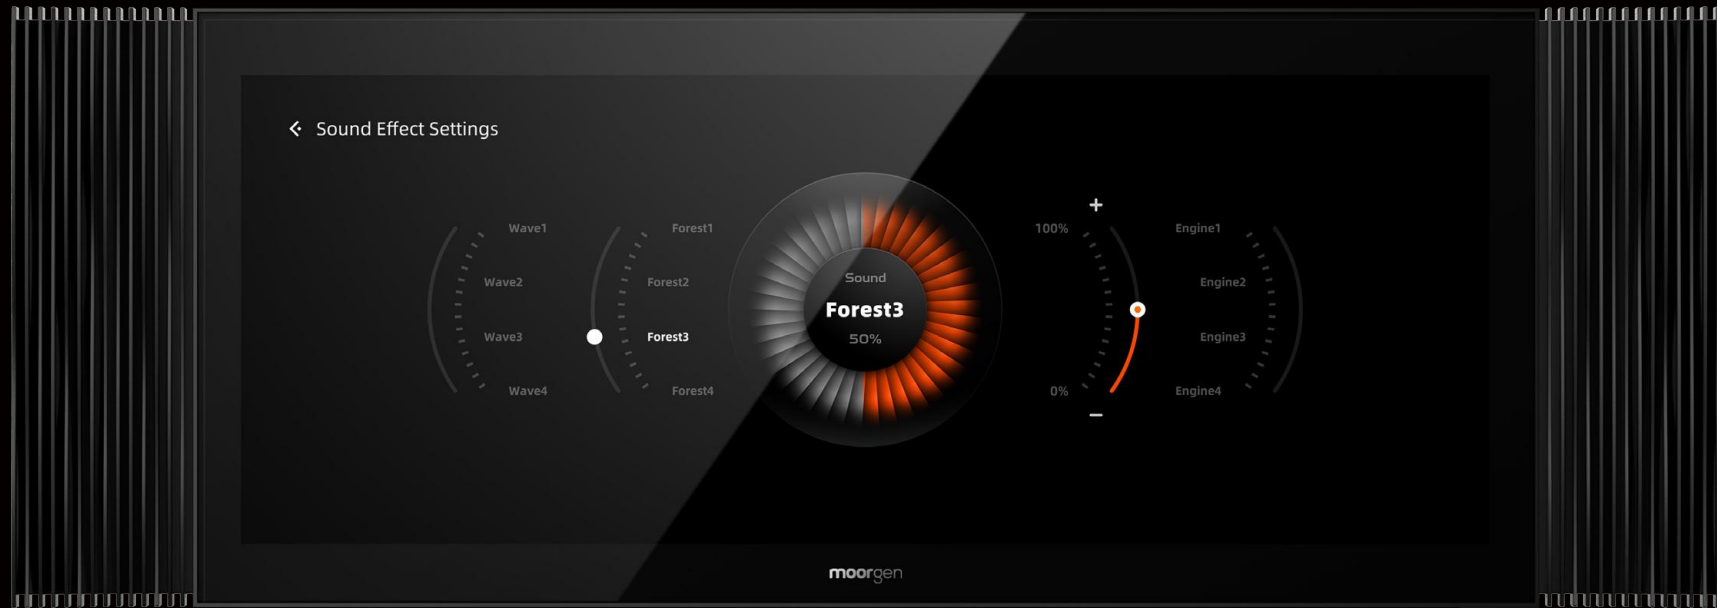

AI Smart User Habit Analysis

The "Homepage" of Italy AI Smart Screen usually displays 10 "your most frequently used" keys

As is AI smart, the system will display your most used "top 10 keys" of this "big screen" on the homepage
For "More keys", you can swipe left to control other keys on the "second page"

Engine UI System Various Dynamic Effects

Smart screen's newest "Engine UI system" also supports all kinds of sound effect customization
The whole UI interface features lots of dynamic effects

Support “ Magic Ball ” Function

Moorgen AI Smart Screen Italy Series
supports “ Magic Ball ” function
after choosing the room
any device that is dragged into the magic ball can be
turned on automatically
and the dragged scenes will also be automatically executed
which is a wonderful experience

Various Optional Screensavers

Moorgen AI Smart Screen Italy Series
can customize the screensaver
animation or display the owner's surname

" Hello, Moorgen "
"Yes"
" Close the curtain "
" Okay "

Close the curtain after 0.5 seconds

Turn Off The Light

Okay, aircon is adjusted to 26 degree

Okay, turn on vacation mode now

Open Encyclopedia

What's end-number
policy today?

Okay, turn off the spotlight in 0.5 seconds

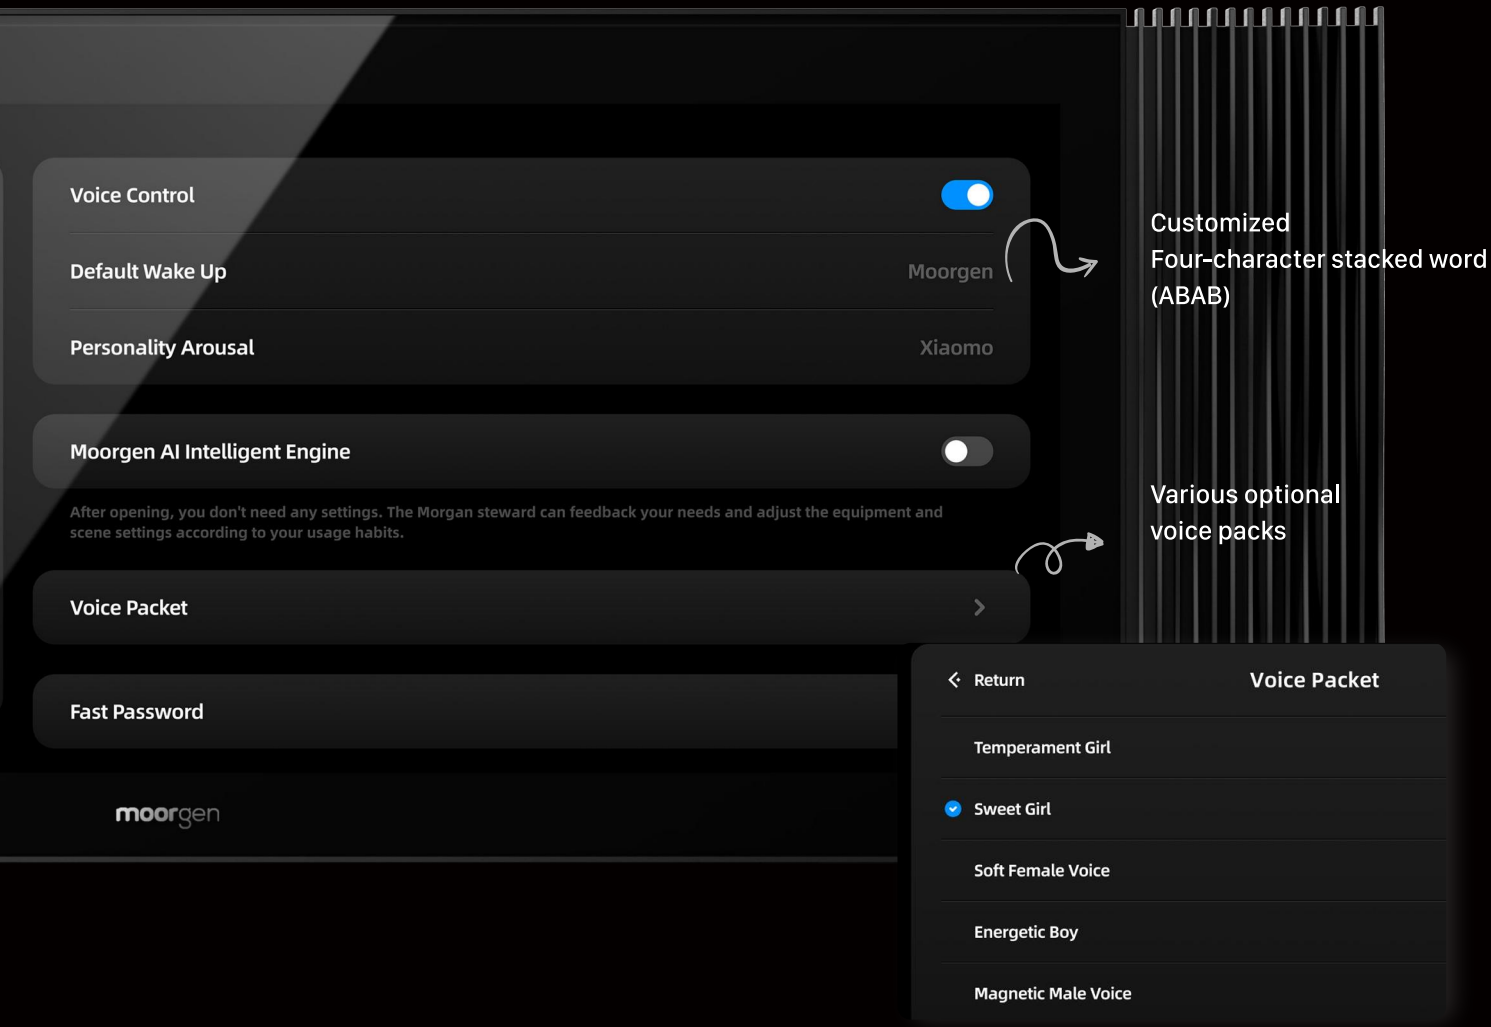

Okay, turn off the spotlight in 0.5 seconds

How many days are left
before National Day

The More You Use, The Smarter It Is The More You Use, It Knows You Better

The Smart Screen features AI voice function
which is able to deeply analyze
the owner's language and living habits
by interacting with the owner and self-learning
You will find that after a period of time
the smart screen can now understand the words
it did not understand before
The information you want to get will be
actively broadcasted

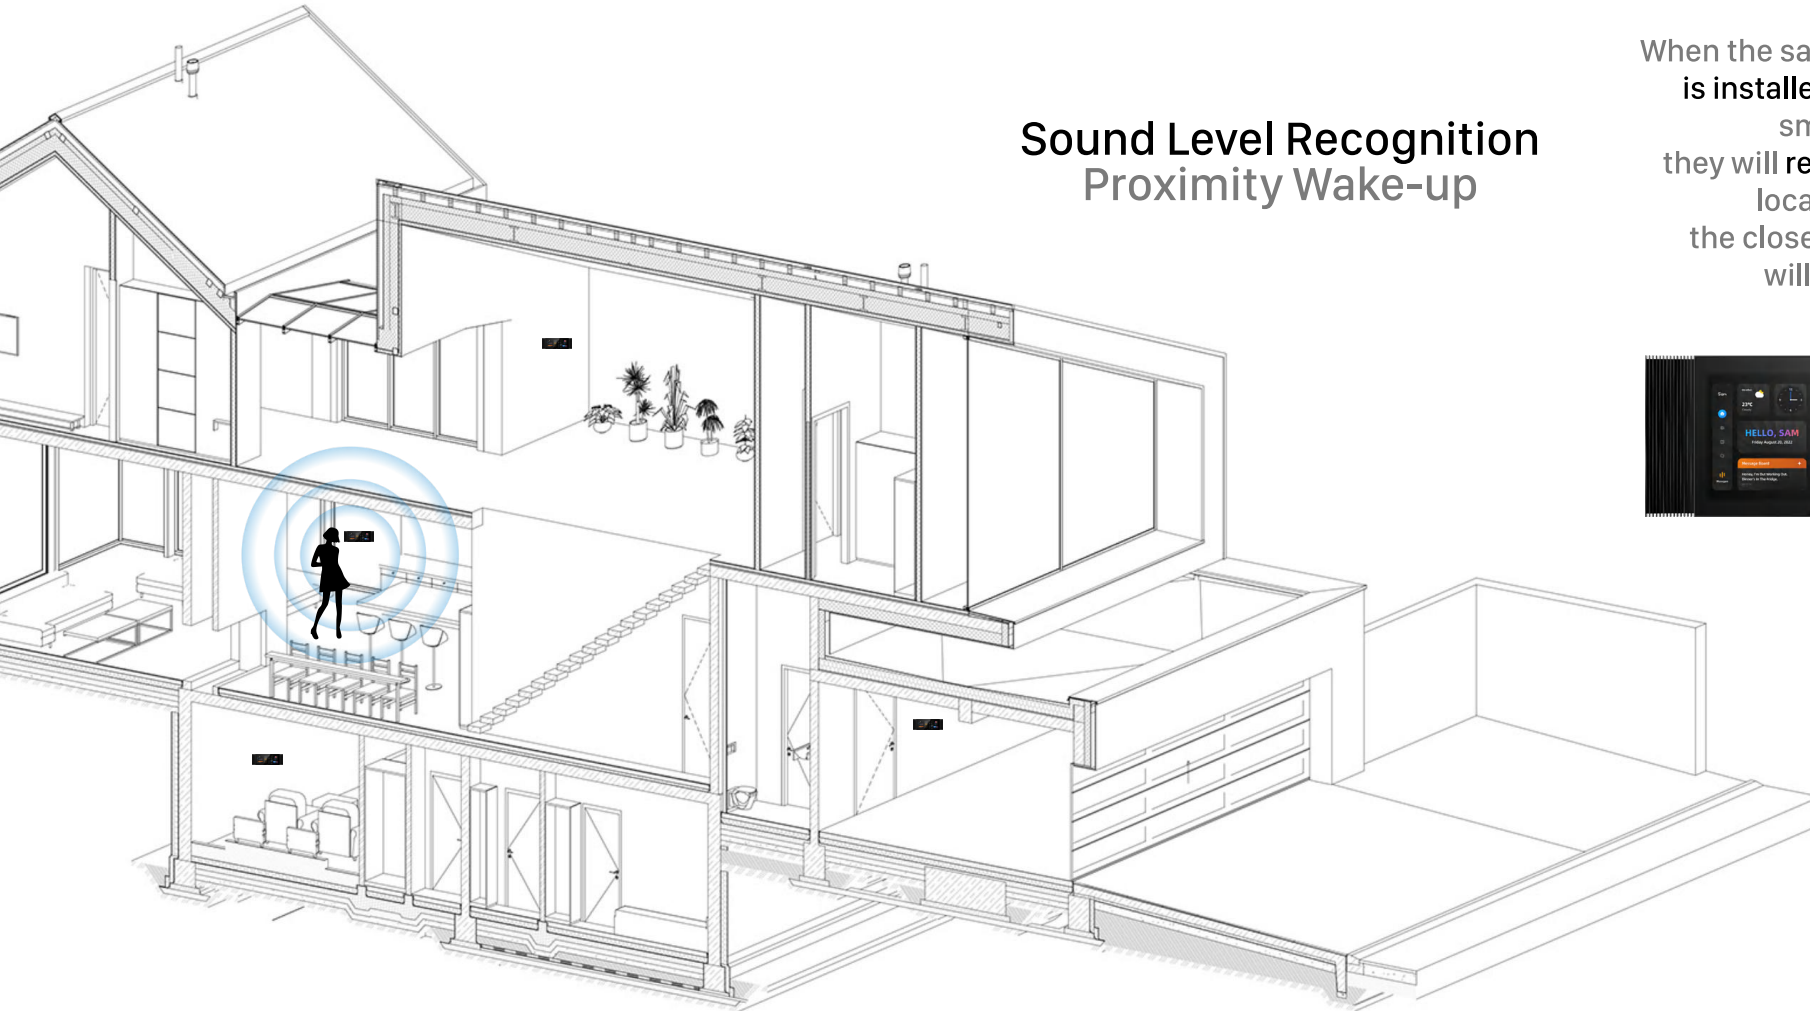

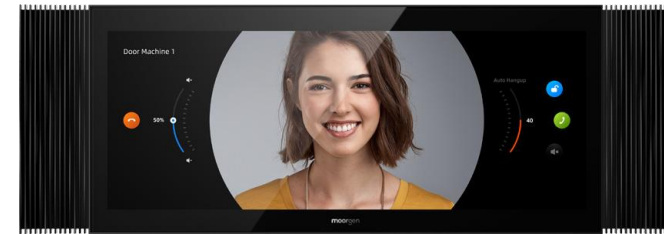

Customized Wakewords Various Voice Packs

Customized voice wakewords, users can define their preferred wakewords to activate the voice function, for example You can say: Xiaomo Xiaomo The smart screen will response immediately The command word is a four-character stacked word The screen will be more intelligent

Sound Level Recognition Proximity Wake-up

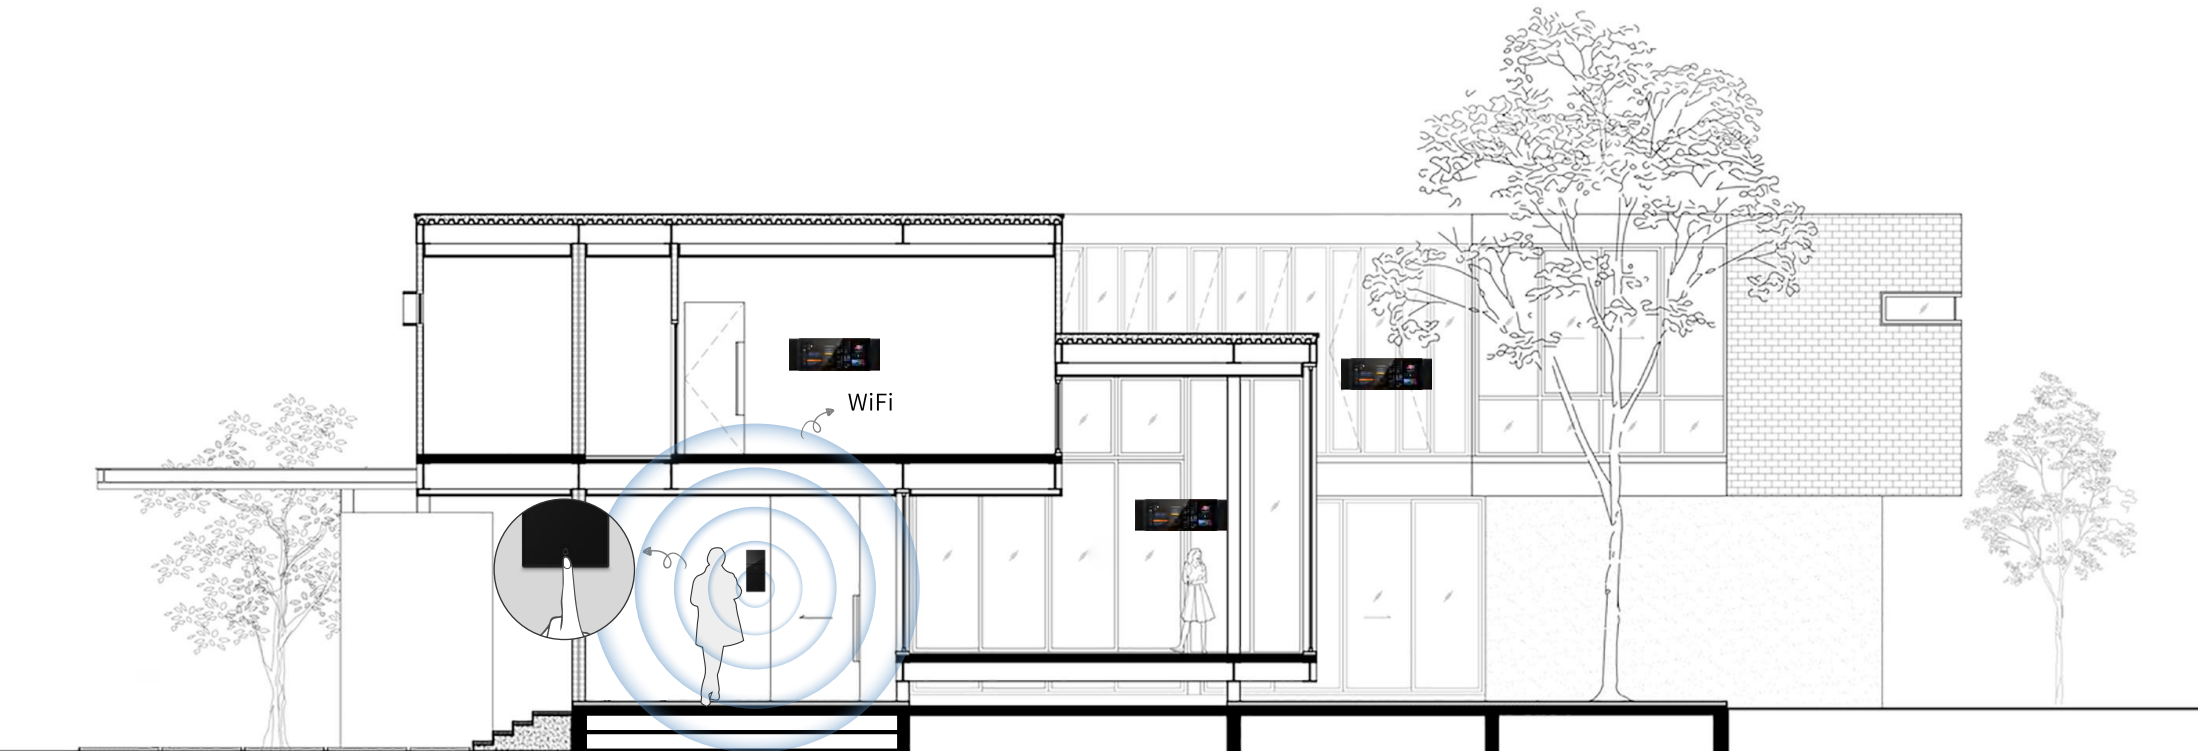

When the same or adjacent space
is installed with two or more
smart screens
they will recognize the owner's
location, and only
the closest AI smart screen
will be woken up

One-key Calling HD Video Call Smart Linkage System

Multiple AI Smart Screens of different floors or spaces features screen-to-screen calling by intercom system
 Moorgen" villa vintage entrance machine "
 features visual intercom, for talking to visitors at the door
 Visitors can be seen on the big screen via the door camera
 This smart screen has smart community function

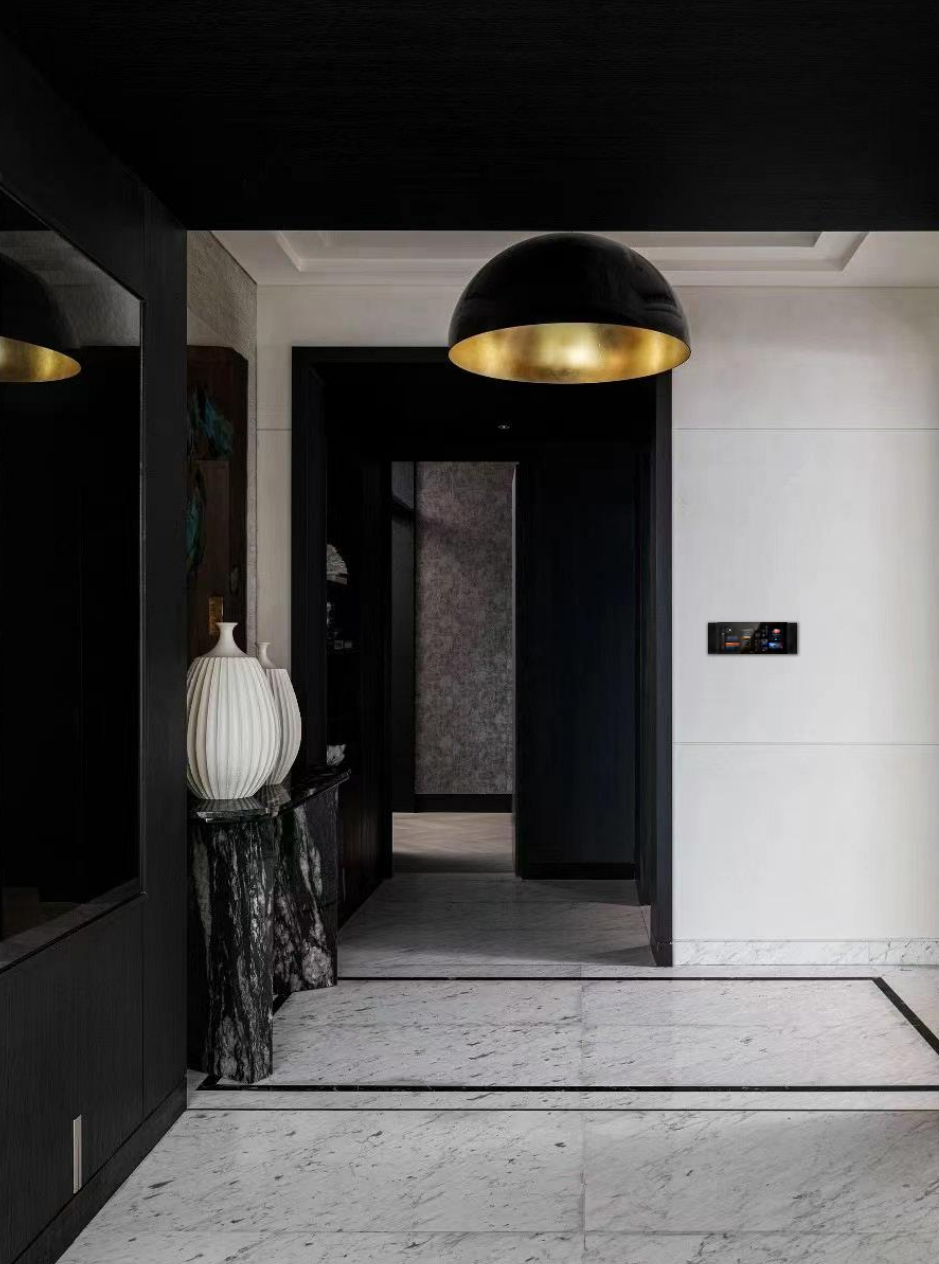

Smart Doorbell System

If you are a penthouse owner, you can install a ready-to-use visual doorbell

This machine does not require additional wiring, no holes need to be cut in the wall

The doorbell can be installed directly on the wall, with anti-tamper alarm

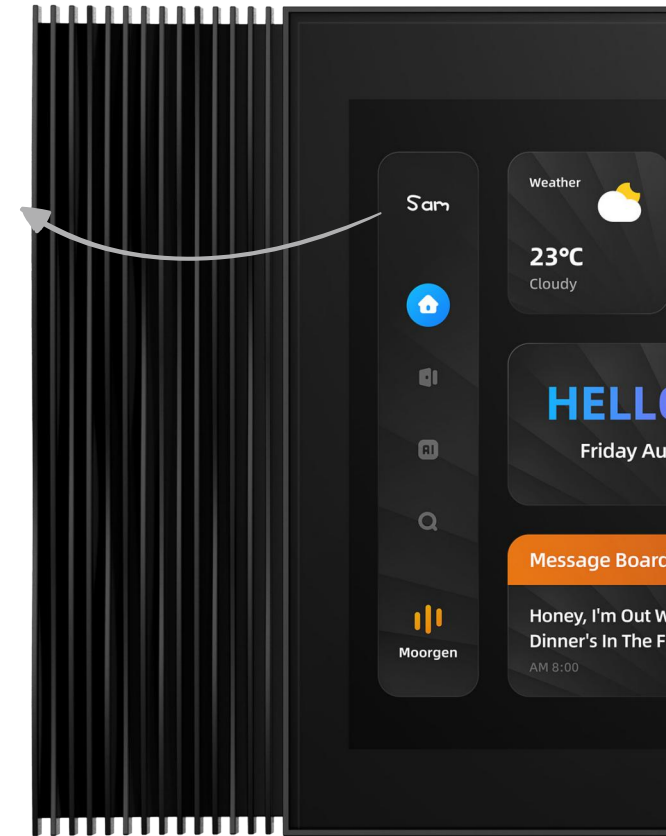

You can interoperate with the indoor smart screen for HD video by connecting to your home WiFi

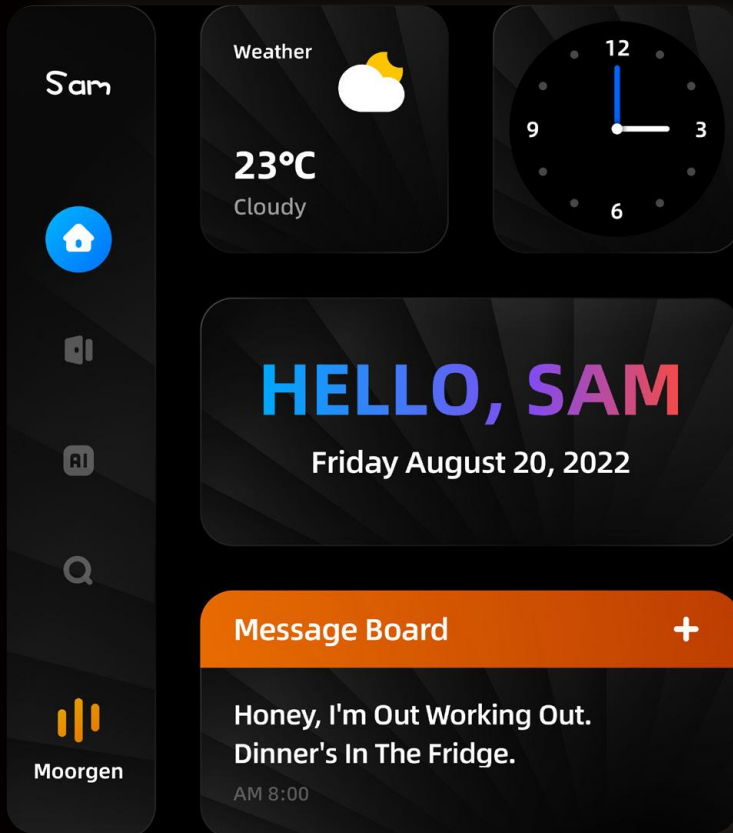

Surname Customization

In the first column of the main menu
we provide " Surname Customization " function
This AI smart screen is usually installed
At the entrance of the foyer

When the owner or guest enters
the door and sees the name on screen
the owner will invisibly feel
the sense of nobility and belonging

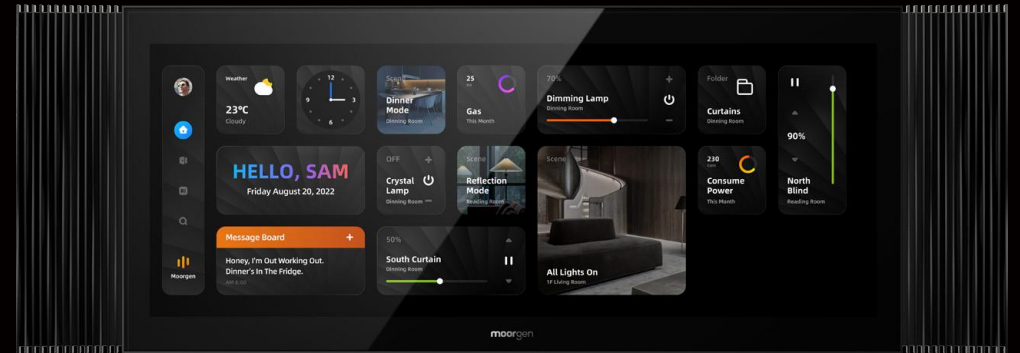

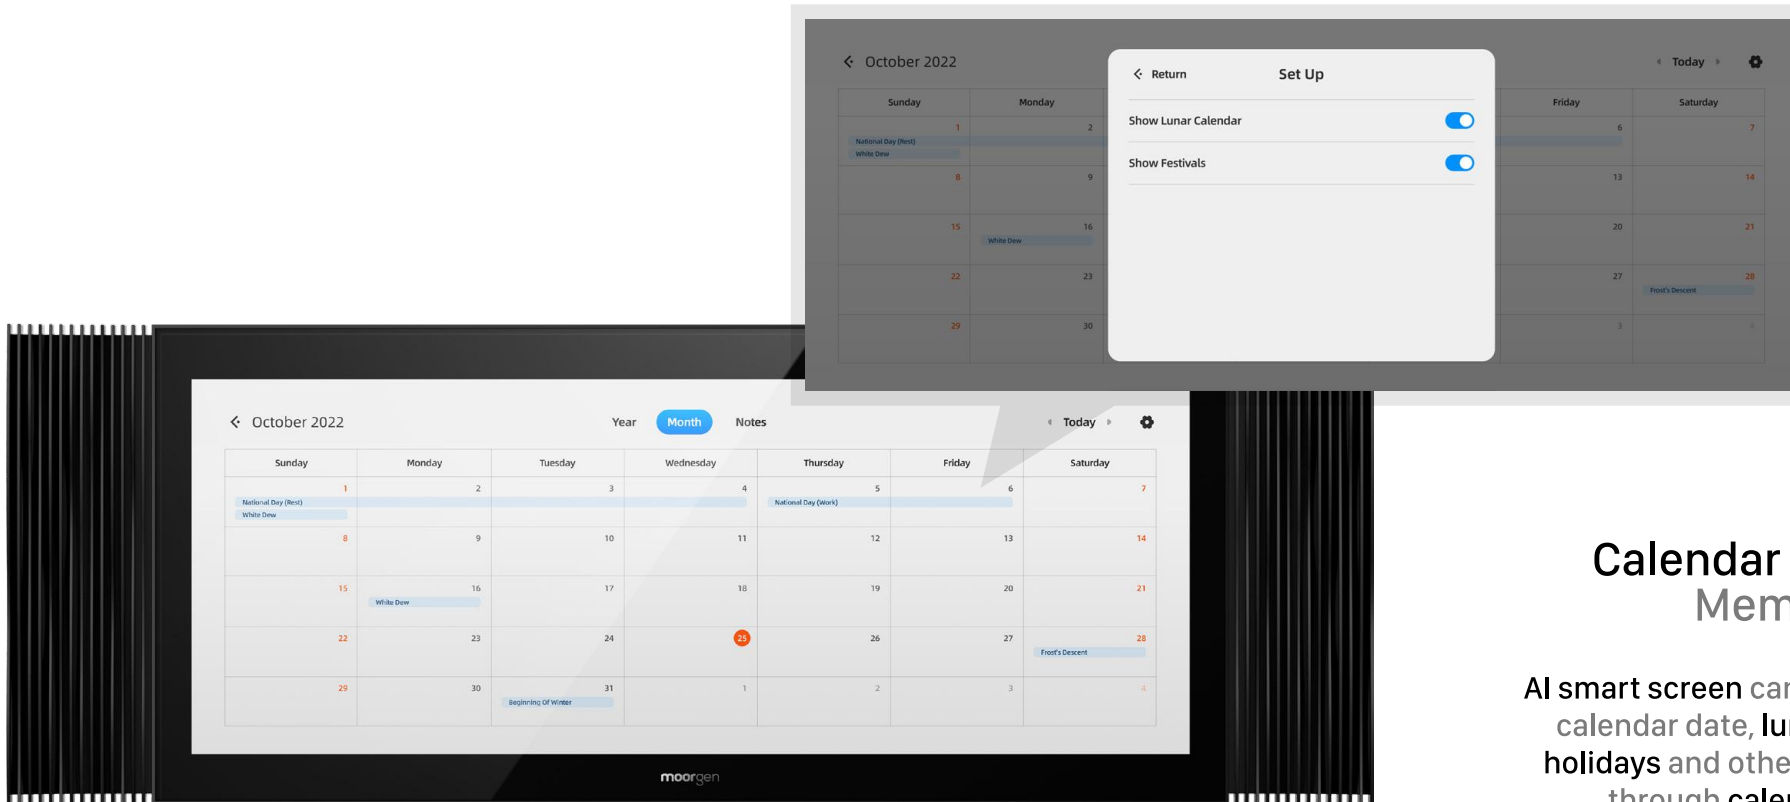

Smart Assistant Into Everyday Life

We have set up a small window for weather and calendar time on the first interface of the AI Smart Screen

When the smart screen is online, it will automatically get the accurate information of weather and time from the cloud

And at the same time, it also features a message board for you to leave messages to your family members

Calendar Query Memo

AI smart screen can check weekly calendar date, lunar calendar holidays and other information through calendar tool

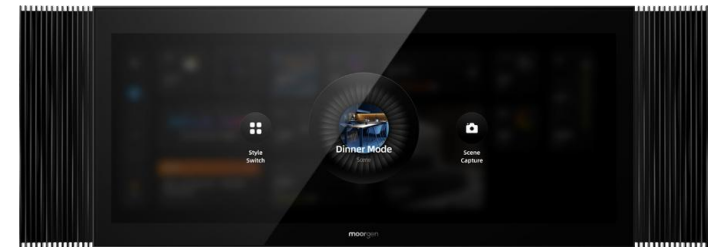

Owners can make a memo on the desired date

When the day is approaching the smart screen will remind the owner on the board window

One-key Scene Capture

Smart screen scene capture, the owner will long press the scene icon for 5 seconds to capture the device state in the current space. If in a few days you don't like the current scene state and want to restore the previous scene which you can find and restore in the APP scene management.

During the day, the screen is automatically brightened
All icons can be seen clearly

At night, the screen is automatically dimmed
to make the screen less dazzling

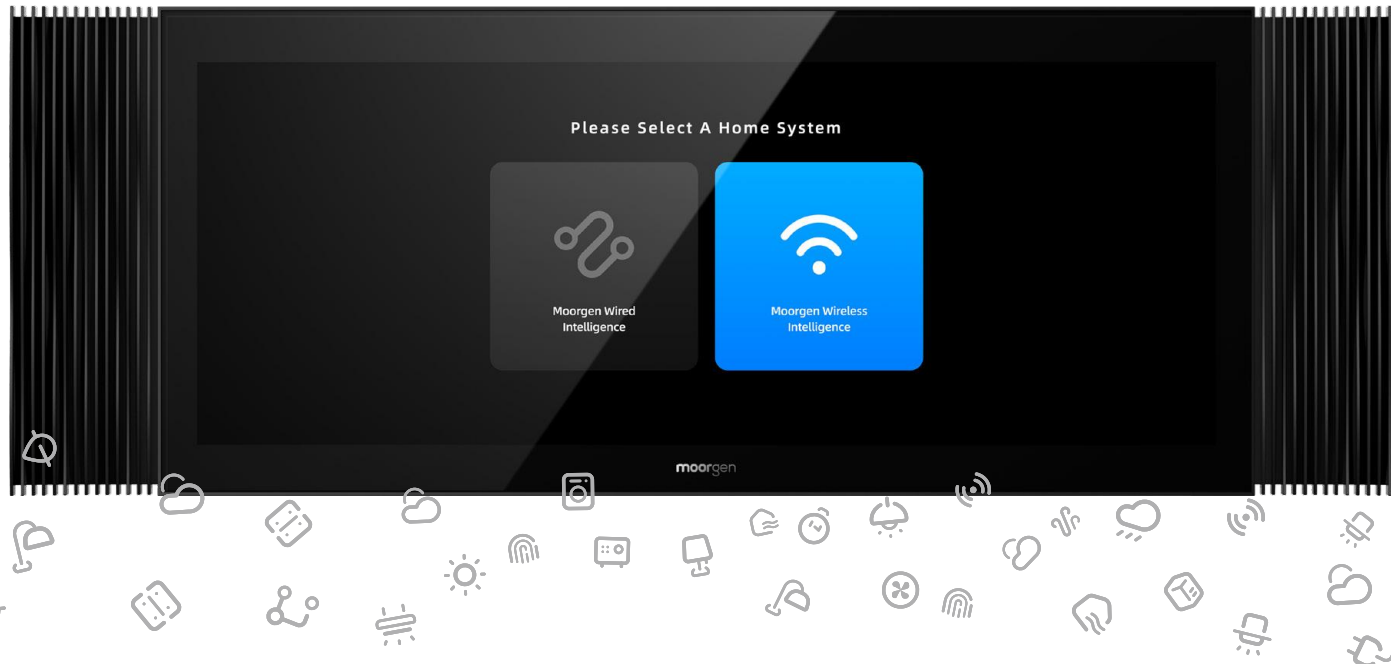

Screen Brightness Automatic Adjustment

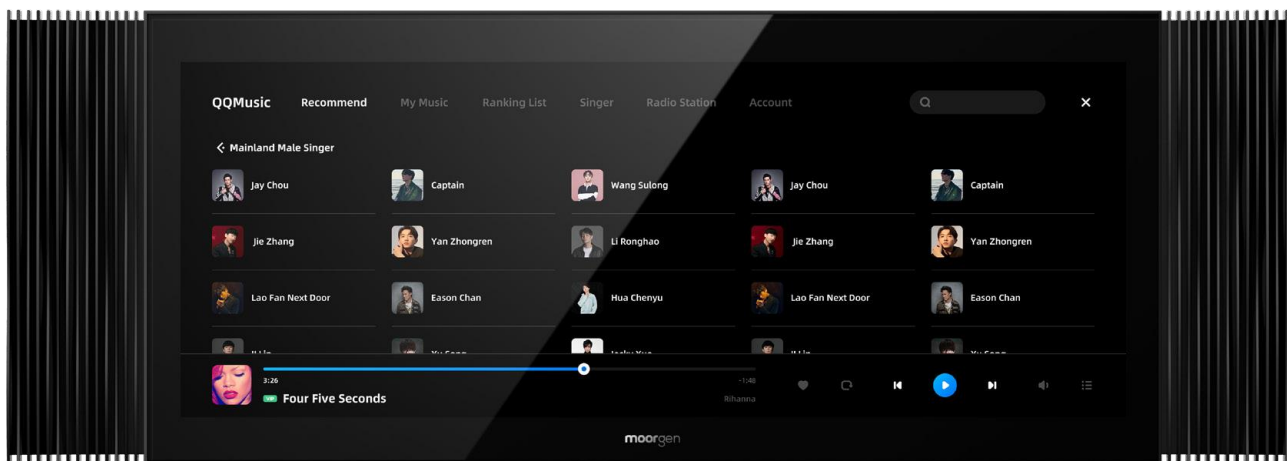

AI smart screen can
automatically adjust the screen brightness
by sensing the external light intensity

Available For Both Wired And Wireless Systems

The cross-system compatible
AI Smart Screen is the central control screen
with powerful functions
whether you are a Moorgen wired system owner
or a wireless system owner
you can use this screen to experience
its rich and interactive functions

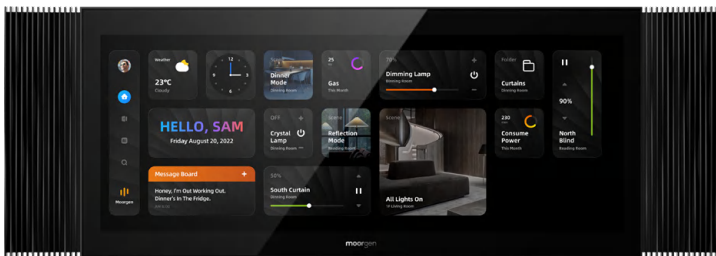

Support QQ Music

Smart screen has built-in QQ Music APP
Synchronized with its membership on cellphone
