M18 "Dimming Knob" design style  
is completely integrated with  
the relatively popular  
"modern minimalism design style"  
of the current "interior space"  
We believe that wall-mounted  
smart panels are essential  
But if a space that also has a  
"wall-mounted rotary remote control"  
it will be perfect

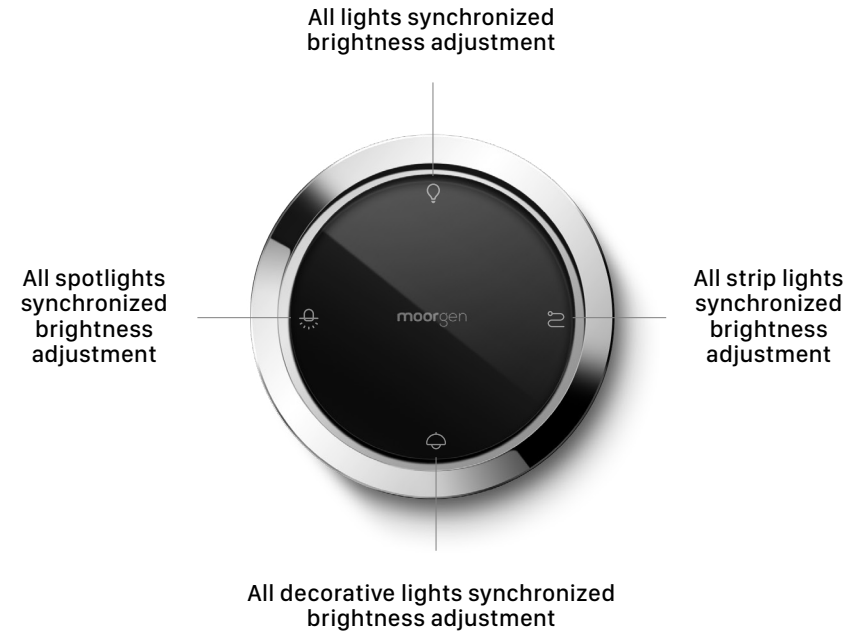

M18 "Dimming Knob" design style  
is completely integrated with  
the relatively popular  
"modern minimalism design style"  
of the current "interior space"  
We believe that  
wall-mounted smart panels  
are essential  
But if a space that also has a  
"wall-mounted rotary remote control"  
it will be perfect

## M18 Smart Dimming Knob Is Essential for Every Space as The "Light Management Expert"

Usually the wall  
rotary remote control  
is not suitable to  
install with smart panels  
Because it's inaesthetic to put  
rectangular and round together  
It is recommended that M18  
be mounted at the 90 degrees  
side of the smart panel on the wall  
It will look better to install  
them on two adjacent walls  
Or install on the innermost  
wall of the room,  
to form a diagonal position  
against the doorway panel

**M18 Series Smart Dimming Knob**  
When rotating  
the handfeel of the "rotary damper"  
is specially tuned by experts

Light 10%  
Room light brightness  
Adjust to 10%

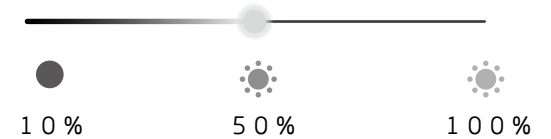

Light 50%  
Room light brightness  
Adjust to 50%

Light 100%  
Room light brightness  
Adjust to 100%

## 0-100% stepless control Rotate as you like

### M18 Smart Dimming Knob

Adjust the brightness of all lights in the space by rotating

Make all spotlights, strip lights, chandeliers, wall lights

Floor lamps, table lamps, footlights, buried lamps

Synchronized brighter and darker

Of course, you can also control each light individually by rotating

Make it brighter and darker,

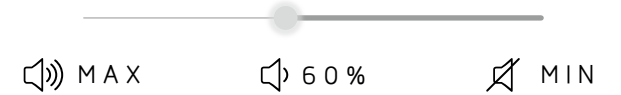

there is another option:

Combine together all the decorative lamps as  
the chandelier, wall lamp, floor lamp and table lamp

to achieve synchronized brighter and darker  
by M18 dimming knob

## 0-100% stepless control Music Volume Control

**Volume of background music**  
**color temperature of lights**  
**Angle of blinds, opening and closing**  
**of awnings or electric curtains**  
**Any powered device with adjustable functions**  
**can be controlled with M18 Rotary Knob**

**M18 Smart  
Dimming Knob  
with four keys  
Up to control  
four combinations  
Users can custom  
modifications by APP  
and choose the  
devices to control**

Four keys on  
the front of M18  
Press one key  
you can adjust the device's  
percentage state  
by rotating left and right  
For example  
clockwise light turns up

Clockwise light  
turns up

Four keys on  
the front of M18  
Press one key  
you can adjust the device's  
percentage state  
by rotating left and right  
For example  
counterclockwise  
light turns down

Counterclockwise  
light turns down

# One Key Two Functions

Select the device to control by a tap and then by rotating you can control the device state  
For example:  
light brightness  
opening percentage of the curtain  
and the volume

Of course, you can also "Double-tap" this key to execute a scene command without rotating it again  
For example  
start chat mode  
or turn on 100% light brightness

The dial is engraved with icon

The dial is engraved with text

## One Key Two Functions

For your convenience  
we offer you  
customized scene  
names of two functions  
to engrave on the surface glass of  
the remote control  
Icon indicates that  
if you press the key  
0%-100% device control  
can be achieved by rotating  
Text indicates the scene that  
will be executed with double tap

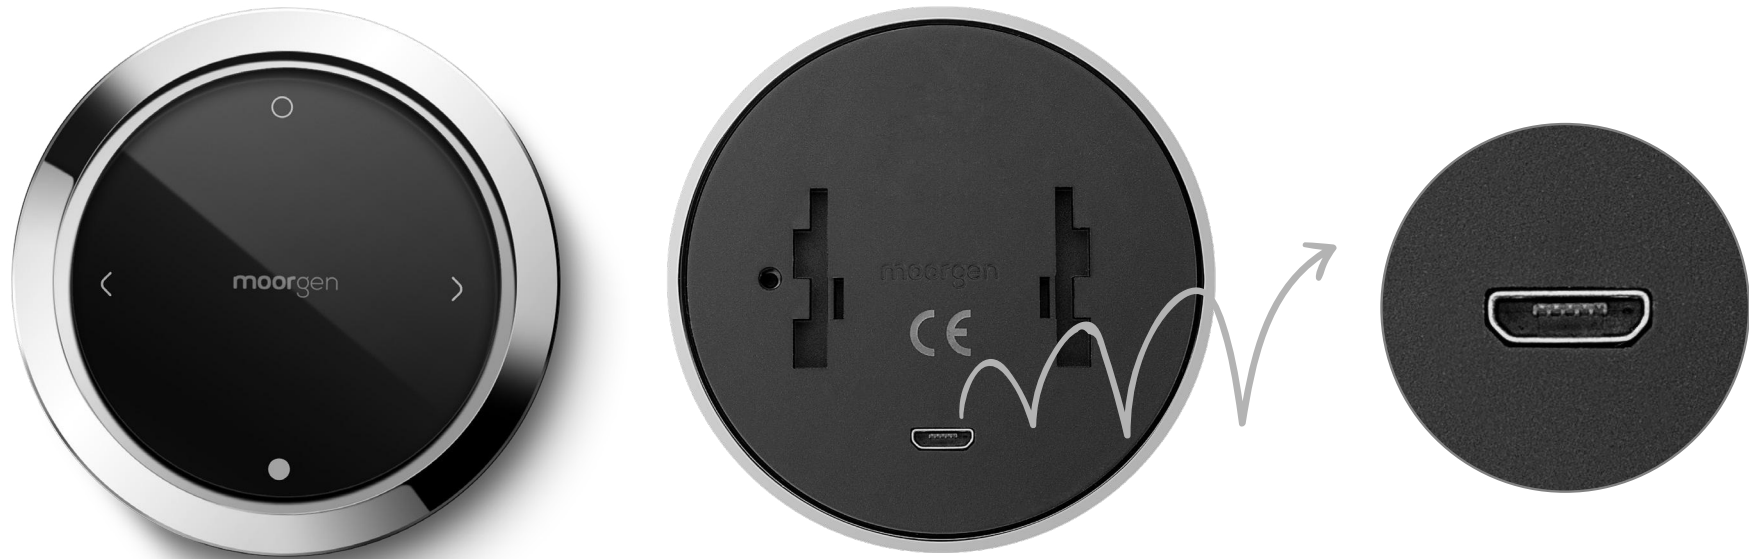

on the front surface of the dial
